1. Header Record Format

Direct Entry payment files submitted to the Commonwealth Bank for processing require the following file structure:

- A header record (one per user)
- Detail records (variable number)
- A File trailer record (one per user)

Payment files consist of a single header record, followed by at least 2 detail records, followed by a single trailer record. Each record should be 120 characters in length. Only the final fields in the header and trailer records can be dropped; the length in this case must be 80 characters.

Direct Entry files must include a contra entry to the user's nominated account(s) to ensure the files are self-balancing. The last field in each record must be followed by a carriage return line feed (CRLF) character (ASCII values 13 & 10). Direct Entry files should also be self-balancing.
